REM II MEMORANDUM

TO: Gene Wong, US EPA
FROM: Ed Need *ENK*
DATE: October 28, 1985
PROJECT: Skinner Landfill, Site 130
DOCUMENT NO.: 130-WP1-EP-BVSQ-1
SUBJECT: Skinner QAPP and Sampling & Analysis Plan

ACTION: Approval

In accordance with comments received at our meeting of 18 July 1985, the following revisions were made to the Skinner QAPP and Sampling & Analysis Plan:

- *Sampling of drum residues was retained.
- *Three off-site soil samples were added.
- *The ecological survey was identified as being qualitative in nature and based on field observations.
- *SAS's were written for more thorough identification of tentatively identified compounds for all CLP testing, and for identification and quantification of seven chlorinated pesticides previously identified as being present on site.
- *Information regarding CRL practices were modified in consultation with D. Weslowski and S. Parker to reflect current operating procedures.
- *Information regarding sample bottles and preservatives were updated to reflect current CLP and CRL practices.

With these changes, the documents are ready for your approval. Please call if you have any questions.
